

AIRSHAFT

PRODUCED IN THE EU

WEBER CONVERTING

Danish produced airshaft for up and un winding in all industries.

Our patented way of manufacturing airshafts differs from traditional airshafts and results in a lightweight product with maximum grip and extremely good centering at a competitive price.

AIRSHAFT MODELS

STANDARD AIRSHAFT. Airshafts available in ALL diameters as well as customized, either aluminum or steel, strengthened and weight adjusted for specific tasks. Standard is 3" or 6", but other diameters can be provided at no additional cost.

CARBON AIRSHAFT. Lightweight airshafts easier and safer installation without compromising the machine's capacity. Always manufactured with 3 hoses, resulting in the same good centering as our other airshafts. The market's most competitive price.

AIRSHAFT FOR LABEL INDUSTRY. With valve or for continuous airflow as desired. With specially developed core fixating, by rewinding with multiple cores. From Ø25mm and larger.

SERIES PRODUCED. All airshafts can be manufactured in series of sizes as desired.
